**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a recharging device, classified in class 320, subclass 107.
  - II. Claims 8-21, drawn to a flashlight, classified in class 362, subclass 202.
  - III. Claims 22-26, drawn to a battery pack, classified in class 320, subclass 114.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by themselves or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claims 8-21 are directed to housing structure details of the flashlight for illumination and wherein the combination with a recharging device is in one dependent clause, the recharging device is nominally recited as part of an intended use. The subcombination of a recharging device has separate utility such as in recharging any other power load device.
3. Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2)

Art Unit: 2875

that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the battery pack claims 22-26 are directed to its immediate housing and electrode structure which does nominally recite the intention of connecting to a recharge device. The subcombination has separate utility such as in recharging any power load device.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan Cariaso whose telephone number is (703) 308-1952. The examiner can normally be reached on M-F (9:00-5:30 PM).
